AEGIS Showcasing at I/ITSEC 2014 Conference

Orlando, Florida (December 1, 2014) - AEGIS Technologies will showcase training, simulation and modeling capabilities at the Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) 2014 from December 1-December 4 in Orlando, FL.

AEGIS is proud to again be participating as an exhibitor at I/ITSEC, the world's largest modeling, simulation and training conference which boasts nearly 14,000 participants and more than 500 exhibits. The theme for this year's conference is *Trained and Mission Ready...Deter, Defend, Defeat*.

War Fighter readiness is the end result of the products and services provided by AEGIS Technologies. With more than 25 years of experience delivering training devices, simulators and advanced conceptual systems utilizing commercial-off-the-shelf products, open source initiatives and our highly experienced engineering staff, AEGIS is pleased to continue to serve our customers both foreign and domestic. Our products consist of fully configured simulation and training solutions including hardware, software and services. Located in Booth #2411, AEGIS will be featuring:

- **Mobile Applications and Serious Games for Training** – Apply serious games for training methodology with realistic gameplay, after action review and scoring. Fully staffed game development teams provide training solutions with the ability to play on multiple mobile platforms - anywhere, anytime.
- **Embedded Trainers for Small Unmanned Aircraft Systems (S-UAS)** – Fully embedded simulation training all operators' functions and emergency procedures for family-of-systems small UAS (Puma, Raven, Wasp). Includes individual training with VAMPIRE® and classroom training with VAMPIRE® ITS (Institutional Training System).
- **Terrain Database Development and High Resolution 3D Models** – Creating correlated terrains, cultural features and maps delivered in various SAF and scene generator formats. Full GIS integration ensuring multi-system interoperability and support of real-time simulation. High-resolution 3D models including damage states, sensor representation, articulations and multiple Levels of Detail (LODs).

(more)

“AEGis remains committed to providing quality products and innovative training solutions. I/ITSEC provides us the opportunity to showcase our capabilities as well as keep our finger on the pulse of the War Fighters’ needs and this industry,” said David King, AEGis Executive Vice President of Technology Solutions.

Highlights at the AEGis booth will include demonstrations along with daily receptions from 4:30-6pm on both Tuesday, December 2, and Wednesday, December 3.

About The AEGis Technologies Group, Inc.

AEGis’ highly skilled work force is dedicated to building lasting relationships and providing superior products and services to our customers. Since its founding in 1989, AEGis has been committed to honesty and integrity and was recognized for its honorable business practices by receiving the Better Business Bureau’s Torch Ethics Award, the 2012 Small Business of the Year Award and the Top 20 Best Places to Work Award in 2012 by the Huntsville/Madison County Chamber of Commerce. In addition, AEGis’ President and CEO, Steve Hill, was awarded the 2012 Russell G. Brown Executive Leadership Award for excellence in leadership and entrepreneurship by the Huntsville/Madison County Chamber of Commerce.

AEGis Technologies is a privately held small business headquartered in Huntsville, Alabama, USA, that provides advanced technology and expert consulting services to industries throughout the world. AEGis specializes in modeling & simulation (M&S) and micro/nanoscale technology development. The company’s M&S products and services include simulation software and training simulators; geospatial databases; 3D models; War Fighter exercise support; systems engineering and analysis; verification, validation, and accreditation (VV&A); test and evaluation support; Hardware-in-the-Loop (HWIL) and Man-in-the-Loop (MIL) simulation. Advanced Technologies excels in advancing cutting edge micro and nanoscale technologies from concept to deployment with applications ranging from defense to energy to biotechnology.

AEGis has enjoyed steady growth with revenues increasing to \$65+ million in sales and employment of 300+ professionals. AEGis has been instrumental in the acceptance of M&S as a profession, as a graduate program of study among many colleges and universities and in the creation of an M&S standards and professional certification across the international M&S professional community-of-practice.
