### **AEgis Technologies Acquires EvaluMation, LLC**

**Huntsville, Alabama (June 15, 2015)** – Aegis Technologies has acquired EvaluMation, LLC, as part of Aegis West Operations in Albuquerque, New Mexico. Aegis worked with EvaluMation on a successful high energy laser weapon system test where the team delivered high quality data acquisition systems for the project. New staff members will work in the Aegis Albuquerque office and laser laboratory located in the Sandia Science & Technology Park.

“The acquisition of EvaluMation is significant for many reasons,” according to Pat Cannon, Aegis Vice President of West Operations. “The addition of a great staff that is exceedingly qualified in developing NIST-standard instrumentation, control systems and software expands the types of services and products we can offer our current customers. It also positions us to expand Aegis’ traditional core capabilities of modeling and simulation, systems engineering and test and evaluation into the areas of cyber security, trusted manufacturing and nuclear surety where EvaluMation already has a presence.”

Joshua Goldberg, former owner and software consultant at EvaluMation, is now a senior software engineer with Aegis. He adds, “After years of working as a supplier for Aegis, I am excited to finally work for the business that I helped to service through EvaluMation. Aegis has the same core values as EvaluMation such as honesty, integrity, quality and professionalism. It is Aegis’ business culture that drew me to them, and we are happy to now be a part of this organization.”

Formed in 2007, EvaluMation was a consulting organization that specialized in the development of high quality hardware and software used to acquire data, control systems and automate processes. EvaluMation has serviced both government and commercial entities. Customers included Sandia National Laboratories, General Electric and Siemens.

### **About The Aegis Technologies Group Inc.**

Aegis Technologies is a privately held small business headquartered in Huntsville, Alabama, USA, that provides advanced technology and expert consulting services to industries throughout the world. Aegis specializes in modeling & simulation (M&S) and micro/nanoscale technology development. The company’s M&S products and services include simulation software and training simulators; geospatial databases; 3D models; war fighter exercise support; systems engineering and analysis; verification,

validation, and accreditation (VV&A); test and evaluation support; Hardware-in-the-Loop (HWIL) and Man-in-the-Loop (MIL) simulation. AEGIS' Advanced Technologies Division excels in advancing cutting edge micro and nanoscale technologies with applications ranging from defense to energy to biotechnology.

AEGIS was awarded one of the Top 20 Best Places to Work in 2012 by the Huntsville/Madison County Chamber of Commerce and was also awarded the 2012 Small Business of the Year. AEGIS' President & CEO, Steve Hill, was awarded the 2012 Russell G. Brown Executive Leadership Award for excellence in leadership and entrepreneurship.

AEGIS has enjoyed steady growth with revenues increasing to \$65+ million in sales and employment of 325+ professionals. AEGIS has been instrumental in the acceptance of M&S as a profession, as a graduate program of study and in the creation of an M&S standards and professional certification across the international M&S professional community-of-practice. Since its founding in 1989, AEGIS is committed to honesty and integrity and has been recognized for its honorable business practices by receiving the Better Business Bureau's Torch Ethics Award. The company's highly skilled work force is dedicated to building lasting relationships and providing superior products and services to our customers.
