For Immediate Release

**AEgis Technologies Exhibiting at I/ITSEC 2015
Featuring Visual-Eyes 3D App and Technology Demos**

Orlando, Florida (November 16, 2015) – AEgis Technologies will showcase its array of training and simulation capabilities at Booth #1901 during the Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) to be held November 30-December 3, 2015, in Orlando, FL.

Visual-Eyes 3D App

AEgis will unveil an exciting Augmented Reality (AR) and Virtual Reality (VR) demonstration that AEgis specifically designed and created for Google Cardboard technology. [Download](#) the Visual-Eyes app on either the Apple or Android app store to get a sneak peek of the Virtual Training Garage and Interactive Augmented Reality Engagements. Visit Booth #1901 and grab your own free Google Cardboard device for proper 3D viewing. Only 1,000 devices will be available at the show. They won't last long so customers are encouraged to download the Visual-Eyes app and grab their own AEgis Google Cardboard.

With Visual-Eyes, the user can immerse themselves in a 3D world by entering a virtual training garage and navigating 360 degrees around three military vehicles: AH-64, F-15E or M3A3. The augmented reality experience allows users to defend their position by firing at either a tank or an unmanned air system (drone). The Visual-Eyes app was created to give users a tangible experience in how virtual and augmented reality is both accessible and ideal for: education, maintenance, real-time training and, in all honesty, just plain fun.

Live Demos

The AEGis booth will also showcase [MONARCH](#), a flexible powerful interoperability solution, as part of the Operation Blended Warrior (OBW) exercise. MONARCH is a programmable message translation and routing application that enables communications between simulation and other systems in training and operational environments.

Plus, there will be additional live demos on new VAMPIRE[®] Pro trainer for UAS; Synthetic Environment Core (SE Core) Common Moving 3D Models; and Geospatial Programs (including Games for Training, Interactive Multimedia Instruction, Terrain Database Development, and Real-time 3D Models).

I/ITSEC 3D Model Sale

For one week only, AEGis Elements is offering [Free 3D Model Downloads](#) during I/ITSEC conference dates: November 30-December 3. Hundreds of high-fidelity, 3D Models to choose from with applications that include gaming, simulators, demos, STEM-based education programs and more. Free model downloads plus custom 2D and 3D quotes are also available. The I/ITSEC Sale also includes a bundled package featuring 50 models for \$5,000 for one week only.

About The AEGis Technologies Group Inc.

AEGis Technologies is a privately held small business headquartered in Huntsville, Alabama, USA. AEGis specializes in utilizing modeling & simulation (M&S) technology to support weapon systems development and create training solutions so our war fighters make it home safely. Our M&S products and services include simulation software and training simulators; geospatial databases; 3D models; warfighter exercise support; systems engineering and analysis; verification, validation, and accreditation (VV&A); test and evaluation support; and Hardware-in-the-Loop (HWIL) simulation.

Our engineers and scientists excel in advancing cutting edge technologies from concept to deployment with applications ranging from defense to energy to biotechnology. Our expertise includes system development and integration, mechanical and optical development, microelectronics, directed energy sensors and instrumentation, laser eye protection, advanced coatings, metamaterials/plasmonics and pharmacokinetic modeling.

AEGis was awarded one of the Top 20 Best Places to Work in 2012 by the Huntsville/Madison County Chamber of Commerce and was also awarded the 2012 Small Business of the Year. AEGis' President & CEO, Steve Hill, was awarded the 2012 Russell G. Brown Executive Leadership Award for excellence in leadership and entrepreneurship.

AEGis has enjoyed steady growth with revenues increasing to \$60+ million in sales and employment of 325+ professionals. For more than 25 years, AEGis has been instrumental in the acceptance of M&S as a profession, as a graduate program of study and in the creation of an M&S standards and professional
