As lead sponsor, AEgis Vice President of Information Solutions, David Estacio, will make a presentation on interoperability. AEgis will also provide demonstrations throughout the day on Monarch® for Health Services, which is designed to maximize utilization of data exchange between hospitals, practices, health systems, Health Information Exchanges (HIEs), first responder systems, public health and federal health agencies.

Monarch® enables digital communications between otherwise disparate systems, and is a data translation, interface engine for enterprise and system owners. Monarch® contributes to the improvement of health services by creating seamless enterprise data integration, interoperability and connectivity with different systems regardless of the origin of the data.

Monarch®:

- Provides true interconnectivity of all EMR/HER and healthcare database systems
- User reconfigurable, intuitive Graphical User Interface (GUI), no software programming required – reduces time, cost and increased performance
- Rapidly integrates legacy, new and emerging or prototype systems
- Flexible and extensible, multi-point routes
- No impact to computer system(s) performance or throughput
- AEgis has a 15-year proven product history of interoperability for US Government and defense organizations worldwide
