AEGIS Wins Two Contracts to Build High Fidelity 3D Models for US Army Game Studio

Huntsville, Alabama (December 12, 2016) - The AEGIS Technologies Group Inc. has been awarded two competitively solicited contracts to create high fidelity “AAA Game Quality” Three Dimensional (3D) models for the US Army Game Studio (AGS) based out of Redstone Arsenal in Huntsville, Alabama. These contracts support the U.S. Army’s goal to create a library of high quality virtual 3D models for use in next generation simulations, training and gaming platforms to be distributed via the Military Gaming Portal.

“We are excited for the opportunity to deliver these high fidelity 3D models as reusable assets for the United States Army and other Department of Defense customers,” said Tony Castillo, Art Director/Program Manager, Real-time 3D Modeling Programs, AEGIS Technologies. “The current generation of soldiers grew up playing video games that were realistic and believable. AEGIS is proud to be selected as part of an effort to bring the United States Army warfighter training to that same ‘AAA game quality’ level.”

AEGIS was selected in a full and open, Low Price Technically Acceptable (LPTA) competition against the industry’s best 3D model providers, earning the right to provide the Army Game Studio with highly detailed real-time 3D models of both US and Foreign Military vehicles. The 3D models will be constructed with polygon counts averaging 50,000 polygons per model exterior and up to 50,000 polygons per vehicle interior.

This new standard in 3D modeling being produced for the AGS contract incorporates the highest fidelity real-time 3D models to be solicited by a Department of Defense (DoD) customer and delivered by a government contractor.

(more)

“AEgis is proud to have been selected and has already delivered the first phase of models to the customers’ highest satisfaction,” said Lauren Johannesmeyer, AEgis Business Development.

As part of the model delivery, AEgis is required to fully “rig” and test the models for direct integration into the Unreal 4 game engine. The models are built in accordance with a very strict 3D model specification which that encompasses as many foreseeable visual simulation uses as possible, and will undergo a rigorous validation process by US Army vehicle recognition experts to ensure that the models accurately portray the real-world vehicles.

About The AEgis Technologies Group Inc.

AEgis Technologies is a high-tech, privately held small business headquartered in Huntsville, Alabama, that specializes in both modeling and simulation technology and emerging training solutions for military and commercial applications. Our capabilities include: Warfighter Training and Exercise Support; Test and Evaluation; Geospatial-3D Content; Gaming; Interactive Multimedia Instruction (IMI); Unmanned Air Systems (UAS/UAV/Drone); Unmanned Ground Vehicles (UGV)-Robot Simulators; Custom Training Simulators; Cyber Security-Information Assurance; Directed Energy Sensors; Advanced Technologies; Systems Engineering and Analysis; System Development and Integration; Process Control Automation; Verification, Validation, and Accreditation (VV&A); Test Missiles – MAST-M; Information-Big Data Solutions; and Monarch™ Interoperability Solutions.

AEgis has received several awards including: Best Places to Work 2016, Large Business Category, by the Huntsville/Madison County Chamber of Commerce; Top 20 Best Places to Work 2012 by the Huntsville/Madison County Chamber of Commerce; and 2012 Small Business of the Year. AEgis’ President & CEO, Steve Hill, was also awarded the 2012 Russell G. Brown Executive Leadership Award for excellence in leadership and entrepreneurship.

AEgis has enjoyed steady growth with revenues increasing to \$60+ million in sales and employment of 325+ professionals. For more than 25 years, AEgis has been instrumental in the acceptance of M&S as a profession, as a graduate program of study and in the creation of an M&S standards and professional certification across the international M&S professional community-of-practice. Since its founding in 1989, AEgis is committed to honesty and integrity and has been recognized for its honorable business practices by receiving the Better Business Bureau’s Torch Ethics Award. The company’s highly skilled work force is dedicated to building lasting relationships and providing superior products and services to our customers.
