### **AEgis Technologies and Digital Globe Build Free 3-D Database of Haiti**

**Huntsville, Alabama, (January 22, 2010)** - After the 7.0 magnitude earthquake devastated Haiti, Digital Globe asked AEGIS Technologies to create a three dimensional database of the country for distributing to all government and humanitarian agencies for their continued rescue, relief, and reconstruction efforts.

Scott Allman, Director of Geospatial Programs, and his team, including Jana Sankova and Jason Rader, created 3-D images of Haiti before and after the destruction. The decision was then made to offer the database for free by distributing it to agencies around the world

“DigitalGlobe, who has the highest resolution satellite constellation in the world, provided us with amazing imagery over Haiti. With their ability to collect imagery, anywhere in the world...it showed that a commercial company had the ability to help in a time sensitive disaster such as this...a reaction like that makes huge changes - it's relevant," Allman said.

“We felt it was the right thing to do. And we’re happy that AEGIS Technologies can help the people of Haiti in some way,” Allman added.

#### **About AEGIS Technologies Group**

AEgis is a privately held small business corporation headquartered in Huntsville, Alabama, that provides advanced technology and expert consulting services to industries throughout the world. AEGIS capabilities include Modeling & Simulation software development, training, test support, engineering analysis, hardware design and nanotechnology manufacturing for both government and commercial customers within the United States and internationally.

Since its founding in 1989, AEGIS has been committed to honesty and integrity and has been recognized for its honorable business practices by recently receiving the Better Business Bureau’s Torch Ethics Award. The company’s highly skilled work force is dedicated to building lasting relationships and providing superior products and services to our customers.
