AEgis Technologies Awarded OASIS Small Business Contract

Huntsville, Alabama (April 8, 2014) - The AEgis Technologies Group, an innovative provider of solutions, technologies and services, has been awarded three One Acquisition Solution for Integrated Services (OASIS) Small Business (SB) contracts by the General Services Administration. These awards, announced on February 24th, 2014, provide federal agencies access to professional services and fully integrated solutions across a variety of technology areas from AEgis. AEgis' award consisted of three contracts within the 541712 NAICS Code for Research & Development (Pool 4, 5B and 6 categories).

"AEgis Technologies is proud to be selected as an award winner in several size pools for the innovative OASIS SB contract," said Jay Vaughan, AEgis OASIS Program Manager.

The scope of OASIS spans many areas of expertise and includes any and all components required to formulate a total solution to a professional services-based requirement. Regardless of the specific area of expertise or mission of the agency originating the requirement, OASIS may be used to support and improve an organization's Program Management, Management Consulting, Engineering, Scientific, Logistics, and Financial disciplines that span all life cycle phases for a total integrated solution as described in the OASIS Program Architecture.

"This is a great win for our customers and for our company," said Pat Cannon, Vice President of West Operations. "We have enjoyed growth in our Defense Services business based on our commitment to quality and customer satisfaction. OASIS SB gives us an edge in the marketplace by allowing us to serve more customers, across more agencies, than ever before."

AEgis is currently supporting the Department of Defense and the National Aeronautics and Space Administration with a variety of technology and service solutions. OASIS SB, while available to both agencies, expands access to AEgis' capabilities to other federal agencies utilizing the contract vehicle.
