AEgis Technologies Receives OPTARSS II Small Business Contract Award

Huntsville, Alabama (March 29, 2011) – The Aegis Technologies Group has received an Operations, Planning, Training & Resource Support Services (OPTARSS II) small business contract. Awarded by FORSCOM, OPTARSS II is an indefinite delivery indefinite quantity (ID/IQ) multiple award five-year task order contract with a \$2.5 billion ceiling. Primary task areas include Operational Planning, Training, Modeling and Simulation, Flight Operations, Mobilization Plans and Execution, Deployment Operations, Force Protection Program, and Transformation.

“I am very pleased we were successful in winning an OPTARSS II award as a Small Business Prime Contractor. This will be a strategic contract for our company and allow us to continue to grow in areas of our core capabilities. We have an outstanding team, and are pleased to get the opportunity to play a major role in support of the Army FORSCOM mission,” said Lance Cooper, Aegis Chief Operating Officer.

OPTARSS II services provide the infrastructure necessary to promote Army readiness and ensure that commanders have the ability to operate systematically, strategically, and skillfully when supporting the defense of the United States. Please contact Program Manager Ross Hempstead with any questions – (256) 922-0802 ext. 1117 or rhempstead@aegistg.com.

About The Aegis Technologies Group Inc.

The Aegis Technologies Group is a privately held small business headquartered in Huntsville, Alabama, USA, that provides expert modeling & simulation (M&S) and nanotechnology development services to industries throughout the world. The company’s products and services include simulation software and training systems; warfighter exercise support; simulation development and integration; geospatial programs; systems engineering and analysis; verification, validation, and accreditation (VV&A); and test and evaluation support. Aegis’ Nanogenesis Division excels in advancing cutting edge micro and nanoscale technologies from concept to deployment with applications ranging from defense to energy to biotechnology. www.aegistg.com
